DATA STRUCTURES LABORATORY (Effective from the academic year 2018 -2019) SEMESTER – III					
Course Co		18CSL38	CIE Marks	40	
	f Contact Hours/Week	0:2:2	SEE Marks	60	
	nber of Lab Contact Hours	36	Exam Hours	03	
		Credits – 2	'	1	
Course Le	earning Objectives: This course (18CSL38) will ena	able students to:		
	atory course enable students to get	practical experien	nce in design, develop,	implement, analyze	
	tion/testing of				
	symptotic performance of algorithm				
	near data structures and their appl		_		
	on-Linear data structures and their	applications such	as trees and graphs		
	rting and searching algorithms				
	ons (if any):				
	plement all the programs in 'C / C	C++' Programming	Language and Linux	/ Windows as OS.	
Programs		1	- D :- C f	41	
1.	Design, Develop and Impleme operations.	ent a menu drive	n Program in C for	the following array	
	a. Creating an array of N I	nteger Flements			
	b. Display of array Elemen		leadinos		
	c. Inserting an Element (El				
	d. Deleting an Element at a				
	e. Exit.	C	,		
	Support the program with function	ons for each of the	e above operations.		
2.	Design, Develop and Implement	•	6 1	•	
	a. Read a main String (STI				
	b. Perform Pattern Matchi				
	STR with REP if PAT e	exists in STR. Rep	ort suitable messages	in case PAT does not	
	exist in STR	utiana fan aaal at	Calle aleana amanatian	Doub was Duilt in	
	Support the program with functions.	ctions for each of	the above operations	s. Don't use Built-in	
3.		a menu driven Pr	ogram in C for the foll	owing operations on	
٥.	Design, Develop and Implement a menu driven Program in C for the following operations on STACK of Integers (Array Implementation of Stack with maximum size MAX)				
	a. Push an Element on to S		ok with maximum size	1411 121)	
	b. Pop an Element from St.				
	c. Demonstrate how Stack		eck Palindrome		
	d. Demonstrate Overflow and Underflow situations on Stack				
	e. Display the status of Stack				
	f. Exit				
	Support the program with appropriate support to the program with appropriate support to the program with appropriate support to the program with approximate support to the program with approximate support to the program with approximate support to the program with a pr	priate functions fo	r each of the above op	erations	
A	Design Davids and Invest	Due and		E-managian to Doctor	
4.	Design, Develop and Implement a Program in C for converting an Infix Expression to Postfix Expression. Program should support for both parenthesized and free parenthesized				
	expressions with the operators				
	operands.	. т, - , ', ', '/о (1	Kemamuer), ** (FOWE	i) and aiphandinenc	
5.	Design, Develop and Implement a Program in C for the following Stack Applications				
	a. Evaluation of Suffix expression with single digit operands and operators: +, -, *, /, %,				
	^		6 - F	1	

https://hemanthrajhemu.github.io

b. Solving Tower of Hanoi problem with n disks

Circular QUEUE of Characters (Array Implementation of Queue with maximum size MAX a. Insert an Element on to Circular QUEUE b. Delete an Element from Circular QUEUE c. Demonstrate Overflow and Underflow situations on Circular QUEUE d. Display the status of Circular QUEUE e. Exit Support the program with appropriate functions for each of the above operations 7. Design, Develop and Implement a menu driven Program in C for the following operations Singly Linked List (SLL) of Student Data with the fields: USN, Name, Programme, Standard PhNo a. Create a SLL of N Students Data by using front insertion. b. Display the status of SLL and count the number of nodes in it
 b. Delete an Element from Circular QUEUE c. Demonstrate Overflow and Underflow situations on Circular QUEUE d. Display the status of Circular QUEUE e. Exit Support the program with appropriate functions for each of the above operations 7. Design, Develop and Implement a menu driven Program in C for the following operations Singly Linked List (SLL) of Student Data with the fields: USN, Name, Programme, State PhNo a. Create a SLL of N Students Data by using front insertion. b. Display the status of SLL and count the number of nodes in it
 c. Demonstrate Overflow and Underflow situations on Circular QUEUE d. Display the status of Circular QUEUE e. Exit Support the program with appropriate functions for each of the above operations 7. Design, Develop and Implement a menu driven Program in C for the following operations Singly Linked List (SLL) of Student Data with the fields: USN, Name, Programme, State PhNo a. Create a SLL of N Students Data by using front insertion. b. Display the status of SLL and count the number of nodes in it
 d. Display the status of Circular QUEUE e. Exit Support the program with appropriate functions for each of the above operations 7. Design, Develop and Implement a menu driven Program in C for the following operations Singly Linked List (SLL) of Student Data with the fields: <i>USN</i>, <i>Name</i>, <i>Programme</i>, <i>St. PhNo</i> a. Create a SLL of N Students Data by using <i>front insertion</i>. b. Display the status of SLL and count the number of nodes in it
e. Exit Support the program with appropriate functions for each of the above operations 7. Design, Develop and Implement a menu driven Program in C for the following operations Singly Linked List (SLL) of Student Data with the fields: <i>USN</i> , <i>Name</i> , <i>Programme</i> , <i>St. PhNo</i> a. Create a SLL of N Students Data by using <i>front insertion</i> . b. Display the status of SLL and count the number of nodes in it
e. Exit Support the program with appropriate functions for each of the above operations 7. Design, Develop and Implement a menu driven Program in C for the following operations Singly Linked List (SLL) of Student Data with the fields: <i>USN</i> , <i>Name</i> , <i>Programme</i> , <i>St. PhNo</i> a. Create a SLL of N Students Data by using <i>front insertion</i> . b. Display the status of SLL and count the number of nodes in it
7. Design, Develop and Implement a menu driven Program in C for the following operations Singly Linked List (SLL) of Student Data with the fields: <i>USN, Name, Programme, St. PhNo</i> a. Create a SLL of N Students Data by using <i>front insertion</i> . b. Display the status of SLL and count the number of nodes in it
7. Design, Develop and Implement a menu driven Program in C for the following operations Singly Linked List (SLL) of Student Data with the fields: <i>USN, Name, Programme, St. PhNo</i> a. Create a SLL of N Students Data by using <i>front insertion</i> . b. Display the status of SLL and count the number of nodes in it
Singly Linked List (SLL) of Student Data with the fields: USN, Name, Programme, St. PhNo a. Create a SLL of N Students Data by using front insertion. b. Display the status of SLL and count the number of nodes in it
 a. Create a SLL of N Students Data by using <i>front insertion</i>. b. Display the status of SLL and count the number of nodes in it
b. Display the status of SLL and count the number of nodes in it
b. Display the status of SLL and count the number of nodes in it
c. Perform Insertion / Deletion at End of SLL
d. Perform Insertion / Deletion at Front of SLL(Demonstration of stack)
e. Exit
8. Design, Develop and Implement a menu driven Program in C for the following operations
Doubly Linked List (DLL) of Employee Data with the fields: SSN, Name, Dept, Designation
Sal, PhNo
a. Create a DLL of N Employees Data by using <i>end insertion</i> .
b. Display the status of DLL and count the number of nodes in it
c. Perform Insertion and Deletion at End of DLL
d. Perform Insertion and Deletion at Front of DLL
e. Demonstrate how this DLL can be used as Double Ended Queue.
f. Exit
9. Design, Develop and Implement a Program in C for the following operationson Singly
Circular Linked List (SCLL) with header nodes
a. Represent and Evaluate a Polynomial $P(x,y,z) = 6x^2y^2z-4yz^5+3x^3yz+2xy^5z-2xyz^3$
b. Find the sum of two polynomials POLY1(x,y,z) and POLY2(x,y,z) and store the
result in POLYSUM(x,y,z)
Support the program with appropriate functions for each of the above operations
10. Design, Develop and Implement a menu driven Program in C for the following operations
Binary Search Tree (BST) of Integers.
a. Create a BST of N Integers: 6, 9, 5, 2, 8, 15, 24, 14, 7, 8, 5, 2
b. Traverse the BST in Inorder, Preorder and Post Order
c. Search the BST for a given element (KEY) and report the appropriate message
d. Exit
11. Design, Develop and Implement a Program in C for the following operations on Graph
of Cities
a. Create a Graph of N cities using Adjacency Matrix.
b. Print all the nodes reachable from a given starting node in a digraph using DFS/E
method
12. Given a File of N employee records with a set K of Keys (4-digit) which uniquely determ
the records in file F. Assume that file F is maintained in memory by a Hash Table (HT) o
memory locations with L as the set of memory addresses (2-digit) of locations in HT. Let
keys in K and addresses in L are Integers. Design and develop a Program in C that uses H
function H: K \rightarrow L as H(K)=K mod m (remainder method), and implement hash
technique to map a given key K to the address space L. Resolve the collision (if any) us
linear probing.
Laboratory Outcomes: The student should be able to:

- Analyze and Compare various linear and non-linear data structures
- Code, debug and demonstrate the working nature of different types of data structures and their applications
- Implement, analyze and evaluate the searching and sorting algorithms
- Choose the appropriate data structure for solving real world problems

Conduct of Practical Examination:

- Experiment distribution
 - For laboratories having only one part: Students are allowed to pick one experiment from the lot with equal opportunity.
 - o For laboratories having PART A and PART B: Students are allowed to pick one experiment from PART A and one experiment from PART B, with equal opportunity.
- Change of experiment is allowed only once and marks allotted for procedure to be made zero of the changed part only.
- Marks Distribution (Courseed to change in accoradance with university regulations)
 - c) For laboratories having only one part Procedure + Execution + Viva-Voce: 15+70+15 = 100 Marks
 - d) For laboratories having PART A and PART B
 - i. Part A Procedure + Execution + Viva = 6 + 28 + 6 = 40 Marks
 - ii. Part B Procedure + Execution + Viva = 9 + 42 + 9 = 60 Marks
