COMPUTER GRAPHICS LABORATORY WITH MINI PROJECT [As per Choice Based Credit System (CBCS) scheme] (Effective from the academic year 2017 - 2018) SEMESTER – VI			
Subject Code	17CSL68	IA Marks	40
Number of Lecture Hours/Week	01I + 02P	Exam Marks	60
Total Number of Lecture Hours	40	Exam Hours	03
CREDITS – 02			
Description (If any):			
--			
Lab Experiments:			
PART A			
Design, develop, and implement the following programs using OpenGL API			
<ol style="list-style-type: none"> 1. Implement Brenham’s line drawing algorithm for all types of slope. Refer:Text-1: Chapter 3.5 Refer:Text-2: Chapter 8 2. Create and rotate a triangle about the origin and a fixed point. Refer:Text-1: Chapter 5-4 3. Draw a colour cube and spin it using OpenGL transformation matrices. Refer:Text-2: Modelling a Coloured Cube 4. Draw a color cube and allow the user to move the camera suitably to experiment with perspective viewing. Refer:Text-2: Topic: Positioning of Camera 5. Clip a lines using Cohen-Sutherland algorithm Refer:Text-1: Chapter 6.7 Refer:Text-2: Chapter 8 6. To draw a simple shaded scene consisting of a tea pot on a table. Define suitably the position and properties of the light source along with the properties of the surfaces of the solid object used in the scene. Refer:Text-2: Topic: Lighting and Shading 7. Design, develop and implement recursively subdivide a tetrahedron to form 3D sierpinski gasket. The number of recursive steps is to be specified by the user. Refer: Text-2: Topic:sierpinski gasket. 8. Develop a menu driven program to animate a flag using Bezier Curve algorithm Refer: Text-1: Chapter 8-10 9. Develop a menu driven program to fill the polygon using scan line algorithm 			
Project:			
PART –B (MINI-PROJECT) :			
Student should develop mini project on the topics mentioned below or similar applications			

using Open GL API. Consider all types of attributes like color, thickness, styles, font, background, speed etc., while doing mini project.

(During the practical exam: the students should demonstrate and answer Viva-Voce)

Sample Topics:

Simulation of concepts of OS, Data structures, algorithms etc.

Course outcomes: The students should be able to:

- Apply the concepts of computer graphics
- Implement computer graphics applications using OpenGL
- Implement real world problems using OpenGL

Conduction of Practical Examination:

1. All laboratory experiments from part A are to be included for practical examination.
2. Mini project has to be evaluated for 40 Marks.
3. Report should be prepared in a standard format prescribed for project work.
4. Students are allowed to pick one experiment from the lot.
5. Strictly follow the instructions as printed on the cover page of answer script.
6. Marks distribution:
 - a) Part A: Procedure + Conduction + Viva: **09 + 42 + 09 = 60 Marks**
 - b) Part B: Demonstration + Report + Viva voce = **20+14+06 = 40 Marks**
7. Change of experiment is allowed only once and marks allotted to the procedure part to be made zero.
